“ I am very sorry for your loss. He was my childhood Doctor all the way up until I started working and insurance forced me to pick a primary care. This Man among other things being my Doc used dry ice to remove a wort, Taught me what a blood clot was and what the technical term was for that which I can not spell and most importantly, once when I couldn't breath for 2 weeks immediately shoved me over the table and cracked my back in some fashion, Was the best breath of air I had ever felt in life to that point and since. A man that didn't need medicine all the time to fix you, a teacher in life and a Man I deeply respect. God speed Sir, wish I could give you some of the breath you once gave me, I would in a heart beat. You and your loved ones are in my prayers and you will be in a good place for sure. God Bless you all,the Family, in your time of need
